THE last number of Puck represents the president seated in a chair which he does not nearly fill, with his head buried to the state convention who proved almost out of sight in grandfather's hat, and a dreamy doleful look in his eyes as they pierce with difficulty the surrounding gloom. The hands upon the clock point to the hour of midnight, while perched above is an ebon raven bearing a striking resemblance to jimblaine, and adding by its unwelcome presence to the weird gloom and solemnity of the occasion. Some explanatory remarks of a poetic nature are supplied by the artist, Mr-Keppler, which are especially good, and are reproduced elsewhere for the benefit of our readers.

> THE TARIFF ON TIN PLATE. It is well known that every pound of tin plate used in this country is imported. It is also equally well known that the government compels the importer to pay one cent a pound duty on it, a tariff levied years ago for the purpose of encouraging and fostering the manufacture of tin plate in this country, but entirely without result. The price of every article of tinware is increased by the amount of the duty collected.

The McKinley bill increases the duty from one cent to two and two-tenths on tin plate, a sum which the robbers cents a pound for the purpose of creatingan industry that can say must be mereased to \$16,000,000 in exist only on government bounty or support of the most generous kind, and which can and will be monopolized by a few powerful and wealthy corporations or syndicates able to comvice pensions.'' True enough-and mand and hold the support of the government indefinitely, while they are given absolute control of the home market to plunder and rob at will. There is not a more iniquitous abomination in that bill of abominations than the tin plate tariff. It legalizes sheer robbery of the most wholesale character, and boldly marks the degree of shameless and degrading subserviency to capitalistic plunderers, to which the grand

old party has descended. Those conversant with the true inward. ness of the proposed increased tariff. know very well that it is made at the dictation of the iron kings of Pennsylvania. They are to be the beneficiaries of it, they and no others.

Small wonder then is it that Plumb raised his voice in condemnation of the bold iniquity. There it is not a Western senator in congress that did not owe it to his people as a religious duty to stamp life out of it; but one only, Davis of Minnesota voted with Plumb against it. Teller felt under obligations to the taroffites who helped him to make a good market for his silver bullion, and voted for the audacious measure. Ingalls is a native Yankee, and could not bring himself to vote against the East with whom all his sympathies are, and so crawfished. Other Western senators had presidential bees in their bonnets, or were under obligations to the their votes at the regular boxes, setting | East, and voted for the outrage.

Senator Teller attempted to palliate the atrocity by saying that "eventually'' the tariff would reduce the price of the squaw men for Paul, although the of tinware. "Yes," said Plumb, with unconcealed sarcasm, "eventually, but when?'1. When it is remembered that

Jim the Penman has a very plausible the proposed tariff will treble the price of every article of tinware beyond that excuse for not going down into Reed's district to make a few speeches in that which would prevail if there were no tariff, it can be readily seen that the milis no need for speech-making since the lennium will have arrived, when the tariff will do for the price of tinware speaker fell back upon the Kittery navy what free trade could do in an instant.

A split took place in the convention just held, and the "straightouts," consisting of the delegates from Charleston, Wilmington, Beauford, Sumter and Richmond, withdrew and organized a separate convention. The Tillmanites had an overwhelming majority in the regular convention, and hence the bolt. Why should a small minority of silk stocking or "oligarchs," as they are sometimes called, adopt this unholy plan of campaign? What hope for success have they? Where is their strength to come from? The question is easily answered: From the Republicans and negroes. Are you astonished at that? Well you may be, when the old guard, the proud and aristocratic wing of South Carolina politics descends to political miscegenation with Senegambians, ex-carpet baggers and the like in order to retain power and office. But that is what they seem to have done, and all in the name of simon pure undifiled Demoeracy; ye Gods!

This appears to be the way of it as well as can be gathered.

As soon as the "Straighants discovered some time ago that they were beaten, they began to claim that the convention which they tried to capture should not name a ticket, should do nothing in fact but determine the manner in which delegates should be selected for a convention to be held later. This of course was nothing but a contemptible subterfuge. Why did they fight so hard for the control of it, if that was all it could do?-but who ever heard of a state convention for such a purpose!

When the "Straightouts" first talked of a bolt, the Republicans took heart, called a convention and announced their intention to profit by the Democratic split to elect several members of the legisia, ture. This activity it seems frightened the would-be bolters, and all talk of a bolt ended for a time.

It is now given out that the Republicans will not put a ticket in the field. and that they will not support Tillman, the farmers' candidate, if there is another ticket out. The fact that there will be another ticket, and that it will be engineered by the "Straightouts," proves that a bargain of some kind has been made with the Republicans.

The alliance is a creditable one indeed for the high-headed aristocrats of the Palmetto state, if it has been arranged as now seems to be the case. The Democratic party should be proud of such leaders, men willing to debase their manhood and the principles they profess or the sake of office, which they appear to think is theirs by heredity and prescription.

Compare them with the leaders in Tennessee, who when downed in convention by the farmers accepted their fate. took their medicine, and hurrahed for the choice of the convention. These South Carolina bolters are a brave lot.

The following verses, recently received at this office, may be deficient in genuine literary merit. and it is undeniable that they have rather a personal and individual than a general interest, but they are so unmistakably the sincere cry of a wounded spirit that we publish them for what they are worth, leaving it to our readers to imagine for themselves the deep painfulness of the situation, at which the poet can merely hint:

Special to the Gazette. CLEBURNE, Tex., Aug. 15.—It was reported on the streets at an early hour that Mr. M. G. Dillon had committed suicide. It seems that Mr. Dillon has been complaining for the past two or three weeks with heart tronble, and last night he was sick all night This morning as usual, about 5 o'clock he got up, as his family supposed to make a fire in the cook stove. He passed through the kitchen and out to the closet in the back yard, where the neighbors say they heard the report of a pistol, but paid no particular attention. About ten minutes after the pistol shot a painter working for and living with Mr. Dillon, went into the back yard and saw smoke coming from the closet. THE COUNTRY'S TRADE.

E. G. Dun & Co- Report There is no Com. plaint from Any Section as to the Volume of Trade the Past Week.

NEW YORK, Aug. 15 .- R. G. Dun & Co.'s weekly review of trade says: Industries are doing rather less and specuintors are doing more than a week ago. The history in brief is the general average of prices of commodities is rapidly rising, and has advanced more than 21 per cent. during the past week. Cotton has fallen 3-16c, but is still so high that purchases are limited. Coffee has not changed, and considerable demand for cheaper grades is reported. A heavy decline appears in the weekly output of pigiron, which was 164,798 tons August 1 against 175,727 July 1, and 180,791 The decrease is attributed mainly to the closing of furnaces for repairs, but last year's production was increased 8000 tons from June 1 to August 1, and it is noticed that some Southern works which were to have begun operating two months ago are still waiting. Prices show little change, though one large Southern concern is reported to be cutting liberally. The demand for finished products is full and well sustained, and some forms of plate iron are a little higher.

except for cheaper grades. Wool does not advance and heavy imports of goods continue. Coal is very dull, and the output still falls below last year's. Dry goods jobbers note that Southern and Western buyers are more numerous in this market than usual, but while cotton goods are well sold up the command for woolens is only fair. Reports from other cities are generally favorable, no complaint being anywhere made as to the volume of current business. St. Louis notes a fair volume of trade, though strength than last ess At Omaha trade is good and at Kansas City about the average. Paper money is 6 to 7 per cent at St. Louis, and in fair demand. Special to the Gazette.

FORT SMITH, ARK., Aug. 5 .- Farrell Daily, a well known young man of this city, was shot and perhaps mortally wounded to-day by Robert Barling, a saloon man. Young Daily came into possession of quite a sum of money a few days ago, and since then has een drinking freely and flying around in buggles. Yesterday, it is alleged, he went to the residence of Barling while he was absent and grossly insulted his wite. Barling armed himself this morning, and about 11 o'clock young Daily came along by his saloon on horseback. Barling walked out and took the horse by the bridle. One or two words passed and the shot was fired. Daily fell from his horse, and was picked up and carried to a saloon opposite Barling's where his wound was temporarily dressed, and he was then taken to his home in a carriage. Late this evening he is reported in a critical condition, but some hopes are entertained of his recovery. Barling surrendered and at once gave His preliminary examination is set for Monday next. QUAY'S SCHEME

Indorsed by a Prominent Pennsylvania Repub lican-His Reasons Therefor-

Special to the Gazette.

PITTSBURG, Pa., Aug. 15 .- B. F. Jones, iron manufacturer and ex-chairman of the Republican national committee, indorses Quay's schem' to kill the force bill and have a final vote on th tariff bill, which he said in its metal schedul was injurious to Pennsylvania, but otherwise all right. The "otherwise" is supposed the mean tin plate, which Pittaburg iron and stee men say they will manufacture on an immense scale. Jones said the framers of the tariff bill made a mistake in arranging the metal schedule to conform with present prices in Europe, which are high and are certain to come to a lower fig-ure, at which point competition with America will be possible.

BEALTY AND BUILDING

Fort Worth Will Have the Best Water That Can be Procured.

Success of the Tucker Hill Artesian Well Experiment-The Arlington Heights Improvements-An Establishment of Value-

The most pleasing tidings that have come to Fort Worth ears for some than were those which were received vesterday afternoon to the effect that the artesian well being put in on Tucker's hill had given forth a new flow of purest aqueaus substance.

The well referred to is one being sunk by the city as an experiment, the object being to provide the city with artesian water exclusively through the time waterworks system which has recently been enlarged and extended, although previously reckoned the finest and most complete in the state. If this experi mental well proves successful by giving forth a large flow, then others will be sunk in different parts of the city, standpipes will be constructed, and without mechanical attachment, is pending merely upon the natural force of the flow, the stand pipes will be kept full and from them the water mains will be supplied with the best drinking water that can be found above or below this green earth.

Yesterday afternoon a number of citizens, Mayor Peter Smith and members of the city council, accompanied by Superintendent of the Waterworks Scotle and Contractor W. S. Marshall, visited the scene of the works. They found that a flow of immense bulk had been secured at a depth of about 1100 feet Several flowing veins had been struck during work on the well, but none them of sufficient volume to satisfy the demand, the original intention being to go a depth of 2000 feet or more if necessary to secure the desired end. The first flow which was struck yesterdny gave a volume of about 200,00 gallons per day. Still the drill went down. A stratum of sandstone was encountered, but in a few hours it had been pierced, and still another beaver vien of water struck, this time giving something like 375,000 gallons per day and toreing the water a considerable were attached it would rise into a stan ipipe of necessary height. The prospects for a full supply of artesian water for Fort Worth were never so bright.

A MAYOR,

The Kind of Men Who Make Cities-A New Enterprise.

W. S. Yest is the name of a gentleman from Wichita, Kan., who was in Fort Worth yesterday on business of pub-He interest. He is the representative of a stone-sawing firm who are looking for location in a live city where much building is under way, and Fort Worth fills the bill. He has determined, if he can get a good location for his business, to move here at once. Stone-sawing is a process by which building stone is sawed and prepared for the mason by means of saws operated by steam, a great saving of time, labor and expense. There except in places like Fort Worth where there is an abundance of stone buildings under & construction. It must be carried on in premises adjacent to the railways and to the place of building. Mr. Yost conferred with Secretary Biden of the chamber of commerce yesterday about premises. Mr. Biden carried him to Mayor Peter Smith.

What kind of a lot do you asked the mayor Mr. Yost explained. "Well," said Mayor Smith, "I've

got a lot down by the railroad, that I think will do, and if it suits you I'll make you a present of it. " They went to look at the lot, and Mr. Yost expressed himself pleased with it. The establishment will employ from

thirty-five to forty hands.

AT ARLINGTON HEIGHTS. Carloads of Citizens Visit the Beautiful

New Suburb. Yesterday afternoon when it became generally known that cars were running regularly to Arlington Heights and return many citizens, ladies as well as gentlemen, gathered on Seventh street to make the trip. During the early part of the day only one car was run, but in the afternoon so many passengers were taken on a trailer had to be added, and

it was loaded down on every trip. The cars run with astonishing smoothness and freedom from jar. At the heights the vast improvements under way evoked expressions of amazement from those who had not seen them

before. The cars on the Arlington Heights street railway will run regularly every twenty minutes, commencing Saturday, August 16, at I o'clock p. m. The last car will leave Arlington Heights for the city at 10 o'clock p. m., and the last car for Arlington Heights will leave the corner of Seventh and Rusk streets at 10:30 o'eloek p. m.
